CAREER OBJECTIVES AND CORE STRENGTHS

I am deeply committed to conserving the natural world, with a focus on addressing the challenges of climate change. I am pursuing a career in sustainability to make a positive, lasting impact on our planet. My key strengths include:

- **Collaboration:** Experienced working across teams and disciplines to accomplish shared goals
- **Adaptable**: Quick to learn new skills, technologies, and methods
- **Problem-Solving**: Passionate about finding practical, science-based solutions to challenges
- **Field Skills:** Hands-on experience conducting environmental field work on oil and gas locations

TECHNICAL SKILLS

- ESRI Products – ArcGIS Pro, ArcGIS Online, Field Maps, Survey123
- RStudio
- Microsoft Suite – Word, Excel, Outlook
- Part 107 sUAS Drone Pilot
- Technical report writing
- GitHub
- Canva

HIGHER EDUCATION

Professional Science Master's, Ecosystem Science and Sustainability Expected May 2027
Colorado State University, Fort Collins, CO
Relevant Coursework includes Life Cycle Analysis, Scope III Emissions, Environmental Data Analysis and Visualization

Bachelor of Science, Ecosystem Science and Sustainability May 2026
Colorado State University, Fort Collins, CO
Relevant Coursework includes Ecosystem Ecology, Quantitative Reasoning for Ecosystem Science, Global Climate Justice, Geospatial Project Design and Analysis

EXPERIENCE IN NATURAL RESOURCES

Denver International Airport (DEN), City & County of Denver – Denver, CO June 2026 to Present
Environmental Investigation and Sustainability Intern

- Contributed to DEN's airport-wide greenhouse gas inventory to estimate the airport's annual emissions
- Developed an independent research project to calculate background PFAS levels across Colorado's Front Range corridor
- Supported DEN's PFAS Voluntary Cleanup and Redevelopment Program by researching ambient PFAS levels
- Presented findings from a three-month collaborative research project at the Aviation Megatrends Research Showcase

RPG Resources LLC – Denver, CO February 2025 to May 2026
Environmental Scientist I

- Conduct natural resources regulatory compliance surveys and desktop assessments in accordance with the Migratory Bird Treaty Act, Endangered Species Act, and Colorado Parks and Wildlife guidelines
- Perform specialized biological surveys and habitat assessments, such as raptor and eagle nesting surveys, Migratory Bird Treaty Act nesting surveys, topsoil sampling surveys, and vegetation transects
- Contribute to the regulatory permit documents for oil and gas operations, including Topsoil Protection Plans, Light Mitigation Plans, and Dust Suppression Plans to be submitted to the Energy and Carbon Management Commission
- Utilize a variety of tools and datasets– ArcGIS, Survey123, Field Maps, Drone Deploy, USDA Plant Database, NHD, NWI, and others– for spatial analysis, vegetation inventories, and mapping of habitat and environmental constraints

Warner College of Natural Resources – Fort Collins, CO August 2023 to May 2026

Lead Career Services Student Ambassador

- Promoted to lead role in June 2024
- Hold weekly office hours for career education including resume review, LinkedIn profile creation, and job searching strategies
- Create bi-weekly career newsletters using Mailchimp technology
- Use Canva to create marketing materials for social media and advertisements in campus buildings
- Present career topics to current students including Clifton Strengths, resumes, career resources, and networking

RELEVANT ACADEMIC EXPERIENCE

Colorado State University – Fort Collins, CO Fall 2026

Business Sustainability Reporting

- Applied ESG frameworks and metrics to understand relationships between sustainability performance, financial statements, and cost of capital
- Evaluated financially material sustainability issues using SASB, GRI, and IRFS frameworks
- Analyzed qualitative and quantitative ESG data to assess corporate sustainability performance and identify relevant sustainability metrics

Colorado State University – Fort Collins, CO Fall 2026

Greenhouse Gas Policies

- Understanding of carbon tax and markets, regulatory v. voluntary emission reductions, cap and trade, offsets, verification, consumption v. production-based accounting, levels of assurance and risks, governance, and co-benefits
- Characterize some of the key emission control policies and implications for accounting, including national, regional, and international agreements dictating accounting protocols

Colorado State University – Fort Collins, CO Fall 2026

Foundations for Greenhouse Gas Accounting and Management

- Evaluated greenhouse gas accounting frameworks and analyzed national and project-level emissions inventories across sectors
- Analyzed emissions and energy data**,** including unit conversions, GHG equivalencies, and national decarbonization trends
- Evaluated climate mitigation strategies**,** including emission reductions, carbon offsets, renewable energy integration, and land-use tradeoffs

Colorado State University – Fort Collins, CO Spring 2026

Life Cycle Assessment for Sustainability

- Applied life cycle assessment methodologies including goal and scope definition, inventory analysis, impact assessment, and interpretation in accordance with ISO 14040/14044 frameworks
- Conducted a complete cradle-to-gate life cycle assessment using Ecoinvent database via OpenLCA software
- Developed a technical LCA report synthesizing quantitative results, uncertainty considerations, and impact analysis

Colorado State University – Fort Collins, CO Spring 2026

Environmental Data Analysis and Visualization

- Described the basic code, file, and data management skills required to efficiently and effectively analyze environmental datasets of a range of sizes
- Applied linear regression, basic machine learning, and trend analysis techniques to reveal patterns in environmental data relevant to their field of study
- Utilized open-source programming applications such as RStudio and GitHub to conduct environmental data analysis
- Integrated geospatial data into quantitative analyses to address real-world ecosystem science challenges

CERTIFICATIONS

- **Part 107 sUAS Drone Pilot** – Federal Aviation Administration Renewed Annually Since August 2025
- **SOCIAL / HUMANISTIC / BEHAVIORAL RESEARCH** – CITI Program Expires February 2028
- **EDF's Corporate Climate Action Essentials+** – Environmental Defense Fund Completed February 2026

HONORS AND AWARDS

Eldor Paul Outstanding Senior Award – Warner College Dept. of Ecosystem Science and Sustainability May 2026

Outstanding ESS Student – Warner College Council May 2024 and May 2025
